U.S. MARINE CORPS SUSTAINABLE INSTALLATIONS READINESS CAMPAIGN

Chris Fafard
Potomac Hudson Engineering
and
Elmer Ransom
Headquarters U.S. Marine Corps

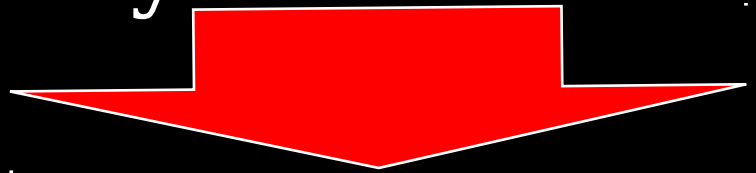
The Evolution

- Pollution Prevention Approach to Compliance Efforts (PACE)
- Environmental and Energy Efficiencies (E3)
- Sustainable Design and Development (SDD)
- Sustainable Installations Readiness Campaign

READINESS

Pollution Prevention Approach to Compliance Efforts (PACE)

- Promote greater investments in P2 solutions to
  to meet environmental compliance requirements
- Focus on a *preventive* vs. *reactive* approach
- Engage early and often with planners, operators
  and process owners



READINESS

Environmental and Energy Efficiencies (E3)

- Independent programs -- same mission

- Improve collaboration -- apply an integrated
  decision-making approach

- Promote more efficient use of resources to
  achieve mutual benefits and common goal

READINESS

Sustainable Design and Development

- Sort out the “Sustainable _____ ” alphabet soup

- Incorporate SDD concepts and principles into facilities and infrastructure projects/processes

- Minimize life cycle costs/impacts

READINESS

Sustainable Installations Readiness Campaign

- Independent components already established;
  systematic coordination and integration needed
- MCB Camp Pendleton: identified and elevated
  encroachment concerns
- MCB Camp Lejeune: developed a model
  "Environmental Sustainability
